CORE COMPETENCIES

QA Vision & Strategy

Expectations, Value, Cost

Global / Remote Team Building

Lifelong remote leader

Metrics & Executive Reporting

Grafana · PowerBI · Snowflake · Tableau

Test Automation

Playwright · Selenium · Pact · Jest

Performance & Load Testing

Gatling · JMeter · k6

CI/CD Pipeline Design

AWS · GitHub · GitLab · Jenkins · SonarQube

AI-Augmented Testing

Accurate · Deterministic · Persistent
PyTorch · XGBoost · FinBERT

Release Engineering

branching strategy · release management · deployment automation

Agile Process Design

Scrum · Kanban · SAgile · Transitions

CODE COMMITTED IN

C · C++ · C# · bash · Java · JavaScript · TypeScript · Go · Python · Swift · Lua · SQL · groovy

COMPLIANCE

HIPAA · SOX · SOC · PCI

QUALITY ENGINEERING & SOFTWARE LEADERSHIP

Quality and engineering leader with over 20 years of experience building organizations for billion-dollar companies and startups. Director-level owner of vision and strategy, leading globally distributed, happy teams, creating metrics programs, automating testing frameworks, and crafting CI/CD pipelines. Actively working on agentic training and evaluation.

TECHNICAL PROJECTS: AI & QUALITY ENGINEERING

- Designed a multi-agent AI training and evaluation pipeline: pre-registered experiments, budget gating, scripted scoring, blinded judge passes.
- Implemented full test pyramids (unit → Pact contract → Playwright E2E) with enforced TDD via agentic rulesets.
- Built and shipped complete products (React Native/Expo and Next.js front ends, Python and TypeScript services, Prisma/SQL data layers) via agentic systems that document requirements, features, and tests while autonomously pushing to production.

EXPERIENCE

Software Quality Engineering Manager

Apr 2024 – Jun 2025

DexCare · healthcare SaaS · Seattle, WA

- Grew and led a global team of 8 SDETs across implementation, product, and support.
- Automated deterministic search testing, **reducing search defects by 90%**.
- Identified extraneous third-party API calls, **cutting costs over \$300,000 annually**.

Software Engineering Manager, QA Manager

Jun 2019 – Jul 2023

Wizards of the Coast · Magic & D&D · Renton, WA

- Led global SDET teams in Tabletop Technology, Data Engineering, and Platform Services.
- Quadrupled test coverage and reduced escaped defects by 90% in one year.**
- Introduced Playwright UI regression, bi-directional Pact contract testing, and load testing as-a-service.
- Reduced server errors by 95% by inserting SonarQube static analysis into the pipeline.
- Rated highest employee-reviewed engineering manager two consecutive years.

Director of Quality Assurance

Aug 2015 – Jun 2017

AudienceScience · ad-tech SaaS for P&G, **140B daily edge transactions** · Bellevue, WA

- Owned QA strategy, Release Engineering, and Release Management for up to 7 global engineering teams: branching, status reporting, release notes, deployment monitoring, incident tracking, outage planning.
- Established company-wide definitions of quality and executive reporting measuring the financial cost of defects, tying reconciliation discrepancies to change-management decisions with accounting.
- Led 3 teams building a new CI/CD pipeline (Jira, Stash, Bamboo, Marathon, Mesos, Ansible, Puppet, Chef, AWS).
- Cut release effort from 144 hours to 2** across 18 major and dozens of minor releases.
- Reduced integration test runtime 75%** through parallel segmentation; implemented Rainforest crowdsourced testing running 1,000+ post-deployment cases in under 30 minutes.

QA Manager, Production Operations Manager, Customer Success Manager

Feb 2010 – Nov 2013

Appature · SaaS relationship marketing for pharma & medical devices · Seattle, WA

- Founded and led the QA, Operations, and Customer Success departments; established Agile development, implementation, and support processes.
- Ensured 100% success rate in SAS70 and partner compliance audits in a regulated environment.
- Reduced “firedrill” production issues by 60% in 3 months, 80% in 6 months.
- Built security and monitoring frameworks (Nagios, Snort, Metasploit); redesigned release tooling, eliminating 98% of deployment downtime.

QA Manager

Mar 2007 – Jul 2009

Wetpaint · consumer wiki platform with rich WYSIWYG editing · Seattle, WA

- Led development of a Selenium-based test automation framework.
- Established product-quality metrics; reduced shipped defects by 90% within 6 months across 27 full release cycles.

EARLIER ROLES

- **Testing Supervisor, Apple:** supervised up to 36 testers and 7 test leads; created a new cross-functional testing organization with executive sponsorship.
- **QA Manager, Communities.com:** led 14 engineers; designed and built a stress-testing rack sustaining 35,000-client load.
- **QA Manager, Bigstep:** led 7 quality engineers; cut shipping defects 70%; Architectural Review Board member.
- **Sr. Billing System Analyst (contract), AT&T Wireless**
- **Sr. Quality Engineer, Organic Online**
- **GUI Test Lead (contract), Ridge Technologies**
- **QA Engineer, GameHouse / RealNetworks:** tested dozens of games across hundreds of mobile handsets.
- **Quality Engineer, UpSellUSA:** built complete QA process with 4 on-time, known-defect-free releases in 6 months.

EDUCATION

Political Science & Computer Science, Sonoma State University

General Education, Music Synthesis, Gavilan College
