

JASON N. ALCOCK

Shelton, WA • jason@alcock.net • 206-948-9388 • [Linkedin.com/in/JasonNAlcock](https://www.linkedin.com/in/JasonNAlcock)

QUALITY LEADER

Devoted people and quality leader with experience creating and implementing robust quality strategies, establishing process improvements, and managing cross-functional programs for global billion-dollar companies and startups. Consistently recognized for driving excellence in software development, promoting a culture of continuous improvement, and commitment to ensuring the delivery of high-quality products that exceed expectations.

AI & DEVELOPMENT CAPABILITIES

Hands-on builder applying AI and modern full-stack development to solve real-world problems. Actively developing production-grade systems spanning reinforcement learning, NLP, and cross-platform applications.

AI/ML Trading Systems: Designed and built ensemble reinforcement learning platforms (PPO, A2C, SAC, DDPG via Stable-Baselines3) for stock and options trading with FinBERT sentiment analysis, XGBoost meta-classifiers, ATR-based risk management, with both paper and live brokerage integration.

Full-Stack Development: Built cross-platform apps in React Native/Expo and Next.js/Prisma, native macOS apps in Swift, real-time WebSocket applications, and economic modeling tools with Monte Carlo simulations.

Testing & Quality Engineering: Authored open-source contract testing libraries (jest-pact, pact-js contributions), implemented comprehensive test pyramids (unit, integration, functional, contract via Pact, E2E via Playwright), and enforced TDD by creating AI swarm rulesets.

Tech Stacks: Python, TypeScript, JavaScript, Swift • PyTorch, Stable-Baselines3, XGBoost, FinBERT • React, React Native, Next.js, Express • Prisma, Streamlit, WebSockets • Playwright, Pact, Jest, k6 • GitHub, GitLab, Jenkins

PROFESSIONAL EXPERIENCE

DexCare, Seattle, WA

2024 – 2025

Providing online scheduling for medical appointments to the top healthcare systems in the country.

Software Quality Engineering Manager

Growing and defining a globally distributed team of SDETs to meet implementation, product, and support needs.

- Created capability matrix and wrote transition plans, resulting in two promotions.
- Hired and embedded into Support and Implementation teams, reducing generalized workload by 70%.
- Implemented SonarQube for code coverage and static analysis, identifying hundreds of improvement opportunities.
- Automated data-driven deterministic search functionality test, reducing search defects by 90%.
- Identified extraneous third-party API calls, reducing costs by over \$300,000 annually.
- Created status dashboard template in Jira for all future customer implementations.

WIZARDS OF THE COAST, Renton, WA

2019 – 2023

Billion-dollar creator of Magic: The Gathering and Dungeons & Dragons.

Software Engineering Manager, QA Manager

Global team of SDETs working with Tabletop Technology, Data Engineering, Platform Services, and internal stakeholders.

- Developed strategic quality goals and metrics for several development teams.
- Quadrupled test coverage and reduced escaped defects by 90% in one year.
- Introduced UI regression using Playwright, bi-directional API contract testing in Pact, and load testing as-a-service.
- Reduced server errors by 95% by inserting static analysis using SonarQube.
- Awarded as highest employee-rated engineering manager for two consecutive years.
- Enabled new engineers to commit code before lunch on day one through changes to onboarding procedures.
- Recruited and onboarded Director-level peers in Engineering, PM, and UX.
- Orchestrated the transition from qTest to TestRail for the entire company.

AUDIENCESCIENCE, Bellevue, WA**2015 – 2017***AudienceScience handled online advertising for Proctor and Gamble.***Director of Quality Assurance**

- Owned QA and Release Management for 7 global engineering teams; branch management, merging code, status reports, release notes, deployment monitoring, incident tracking, and outage planning.
- Optimized release process from 144 person-hours to 2, running 18 major and dozens of minor releases.
- Led 3 teams in the design and implementation of a new CI/CD pipeline of Jira, Stash, Bamboo, Marathon, mesos, ansible, puppet, chef, and AWS.
- Reduced integration test runtime by 75% through segmentation on multiple agents.
- Implemented Rainforest crowdsource testing, running over 1000 post-deployment test cases in under 30 minutes.

APPATURE, Seattle, WA**2010 – 2013***Appature Nexus was a SaaS relationship marketing platform for medical device manufacturers and pharmaceutical companies.***QA Manager, Production Operations Manager, Customer Success Manager**

- Created QA, Operations, and Customer Success Management departments.
- Established Agile Development, Implementation, and Support processes.
- Reduced “Firedrill” issues by 60% in 3 months and 80% in 6 months.
- Ensured 100% success rate in SAS70 and partner compliance audits.
- Built security and monitoring framework using Nagios, Snort, and Metasploit.
- Redesigned release tools and created new processes, eliminating 98% of deployment downtime.

WETPAINT, Seattle, WA**2007 – 2009***Wetpaint's ease of use and WYSIWYG editor belied a tremendously complex and feature-rich wiki application.***QA Manager**

- Reduced shipped defects by 90% within the first 6 months.
- Continuously improved quality over 27 full release cycles.
- Led the development of a Selenium-based automation framework.

GAMEHOUSE/REAL NETWORKS, Seattle, WA**2005 – 2007****QA Engineer**

- Tested dozens of games on hundreds of mobile handsets.
- Assisted in the development of a new testing process.

UPSELLUSA, INC., Seattle, WA**2004 – 2005****Quality Engineer**

- Developed, from scratch, complete Quality Assurance Process.
- Consistent recognition of improved quality from peers and executives.
